Notes:

1. Performance of the ILP Sub-Funds is calculated in SGD on a bid-to-bid basis with any income or dividends reinvested, but excluding such fees and/or charges which may be payable through deduction of premium or cancellation of units.
2. Past performance of an ILP Sub-Fund is not necessarily indicative of its future performance.

INVESTMENT OBJECTIVE OF ILP SUB-FUND

This fund seeks to achieve long-term capital appreciation through investment in equity and equity related securities of European issuers as represented by countries included in the MSCI Europe Index and opportunistically in other European markets, such as Poland, Hungary, Czech Republic, Greece, Turkey and Israel.

INVESTMENT APPROACH OF ILP SUB-FUND

The ILP Sub-Fund follows the investment approach of the underlying fund of Capital Group European Growth and Income Fund (Lux) as the ILP Sub-Fund feeds 100% into the underlying fund.

INVESTMENT APPROACH OF UNDERLYING FUND

The Underlying Fund seeks for long-term capital growth and income through investment primarily in listed Equity of issuers domiciled and/or having their principal place of business in European States. Preservation of capital is also a priority.

The approach was developed with investors in mind who are typically concerned about:

- Long-term growth opportunities
- Paying attention to downside risk

While the portfolio invests specifically in companies domiciled and/or having their principal place of business in Europe, Capital Group believes that a full assessment of investment opportunities requires a local presence along with a global view that encourages robust debate and diversity of ideas.

Key components of the Underlying Fund's investment approach include:

- A long-term view and conservative approach – using bottom-up research helps Capital Group to find European opportunities missed by other investors – many of which are high dividend yielders.

- Broad exposure – investing in Europe means participating in global opportunities: many of Europe's leading companies are global players, with revenue generated from outside of Europe.
- Focus on consistent income and low volatility – the Underlying Fund focuses on seasoned companies with attractive and stable dividends whilst still maintaining the flexibility to invest across the full growth and income spectrum. This allows the Underlying Fund to be well positioned to navigate uncertainty within markets.

Capital Group also considers the integration of ESG issues to be intrinsic to their approach; their experience and research indicate that organisations taking a thoughtful and robust approach to ESG practices are more likely to generate sustainable returns over the long term. ESG considerations are deeply woven into Capital's Group fundamental research, due diligence process and engagement efforts. Given Capital Group's emphasis on fundamental research and bottom-up company selection process, Capital Group would expect stock selection to be the biggest driver of excess returns over the longer term.

Please refer to Capital Group Prospectus for further information on the investment policy / approach of the Underlying Fund.

INFORMATION ON THE MANAGER OF ILP SUB-FUND

Capital Group Investment Management Pte. Ltd. (CGIMPL) is the Manager of the ILP Sub-Fund, and is a wholly-owned subsidiary of Capital Group International, Inc., which in turn is owned by The Capital Group Companies, Inc ("Capital Group"). CGIMPL is licensed by the Monetary Authority of Singapore.

Capital Group is one of the oldest and largest asset management companies in the world, managing multi-asset, equity, and fixed income investment strategies for millions of individuals and institutional investors around the world. Since 1931, Capital Group has been singularly focused on delivering superior, consistent results for long-term investors using high-conviction portfolios, rigorous research, and individual accountability. Today, Capital Group works with financial intermediaries and institutions to manage US\$2.8 trillion (as of 30 September 2024) in actively managed equity, fixed income and multi-asset investment portfolios through segregated accounts and funds worldwide.

In the event that the Manager becomes insolvent, securities held by the Custodian are segregated from the other assets of the Manager and ring-fenced against the insolvency of the Manager.

INFORMATION ON THE MANAGER OF UNDERLYING FUND

Capital International Management Company Sàrl is the Luxembourg investment management company of the Underlying Fund and is a wholly-owned subsidiary of Capital Group International, Inc., which in turn is owned by The Capital Group Companies, Inc ("Capital Group").

In the event that the Investment Manager becomes insolvent, securities held by the Custodian are segregated from the other assets of the Investment Manager and ring-fenced against the insolvency of the Investment Manager.

CONFLICT OF INTEREST

The managers of the ILP Sub-Fund and Underlying Fund(s) shall conduct all transactions with or for the ILP Sub-Fund at arm's length. The managers are obligated to separately manage the investments for the ILP Sub-Fund and other funds under their management. If the various funds place orders for the same securities as the ILP Sub-Fund, the managers shall, as far as possible, allocate such securities among the funds in a fair manner.

The managers and their respective associates are or may be involved in other financial, investment and professional activities which may on occasion give rise to a conflict of interest with the management of the ILP Sub-Fund or the Underlying Fund(s). The managers will ensure that the performance of their respective duties will not be impaired by any such involvement. In the event that a conflict of interest does arise, the managers shall endeavour to ensure that it is resolved fairly and in the interest of investors.

RISKS

Derivative Risk

The ILP Sub-Fund and the Underlying Fund are authorised to use derivative instruments from time to time. Derivative instruments are financial contracts whose values are "derived" from the value of the underlying assets. While the professional use of derivatives may be beneficial to the overall investment portfolio, derivatives in themselves involve different risks which may be greater than those of more traditional investments.

As the volatility of prices of derivative instruments may be higher than that of their underlying stocks, commodities or other benchmarks, these derivative instruments are riskier.

Equity Risk

The value of the equity securities which the ILP Sub-Fund invest directly in or through Underlying Fund, will fluctuate depending upon the general trends of stock markets, prevailing interest rates as well as the financial and operating performance of the issuers of those equity securities. The economic environment of the countries and the performance of the industries which the ILP Sub-Fund invests in directly or through Underlying Fund will have an impact on the value of the equity securities acquired. The value of the ILP Sub-Fund and the Underlying Fund are affected by such changes in the market conditions and interest rates.

Currency / Exchange Rate Risk

The Net Asset Value per unit of the ILP Sub-Fund are computed in Singapore Dollars, whereas certain Underlying Fund and the securities which the ILP Sub-Fund invests in are denominated in foreign currencies. Changes in the exchange rate of the Singapore Dollar against the currencies

of denomination of the Underlying Fund and the securities which the ILP Sub-Fund invests in will have an impact on the value of the units.

The investments of the ILP Sub-Fund and the Underlying Fund may each be denominated in a number of different currencies and hence be subjected to fluctuations in currency exchange rates and in certain cases, exchange control regulations. Further, the underlying investments of the Underlying Fund may be acquired in a wide range of currencies, some of which may not be freely convertible currencies. It may not be possible or practicable to hedge against the consequent currency risk exposure and in certain instances the manager may not consider it desirable to hedge against such risk. The manager will enter hedging transactions at its sole discretion.

If you are a non-Singaporean, there may be state regulations governing the outward remittance of your share of net profits and dividends and the repatriation of your investments in a foreign currency.

General Risk

The value of the ILP Sub-Fund and the Underlying Fund's assets may be affected by uncertainties and risks associated with investments. The Net Asset Value of the ILP Sub-Fund and the Underlying Fund will be influenced by the prices of these investments. This will in turn have an impact on the value of Units of the ILP Sub-Fund. Past performance is not necessarily a guide to future performance and investment in the ILP Sub-Fund should be regarded as a medium to long-term investment.

Interest Rate Risk

Bonds and other fixed income securities are interest rate sensitive, which means that their values and consequently, the Net Asset Value of the ILP Sub-Fund which invest in such securities directly or through Underlying Fund, will fluctuate as interest rates fluctuate. An increase in interest rates will generally reduce the value of the fixed income securities. The performance of each ILP Sub-Fund which invests in bonds and other fixed income securities directly or through Underlying Fund, therefore will depend in part on the ability of the Manager of the ILP Sub-Fund or the Underlying Fund to anticipate and respond to such fluctuations in market interest rates and to utilise appropriate strategies to maximise returns to you while attempting to minimise the associated risks to its investment capital.

Investment Risk

There can be no guarantee against loss, nor any assurance that the ILP Sub-Fund's investment objective will be attained. The value of investments and the income from them and therefore the value of, and income from, the Units of each ILP Sub-Fund can fall as well as rise and you may not realize the same amount that you invested. Investment in the ILP Sub-Fund may only be suitable for you if you can accept the associated volatility and risks and are prepared to take a medium to longer term view of your investment.

Liquidity Risk

There is no secondary market for the ILP Sub-Fund. All redemption requests should be made to AIA Customer Service Centre or through your AIA Financial Services Consultant or Insurance Representative. If you are a non-Singaporean, there may be state regulations governing the outward remittance of your share of net profits and dividends and the repatriation of your investments in a foreign currency.

You should note that there may be a limit on the number of units that can be redeemed on any Dealing Day and an investor may not be able to redeem on a Dealing Day if the redemption limit is imposed. Should a limit be imposed, a redemption request may be deferred to the next Dealing Day (which is subject to the same limit) if the redemptions exceed the limit on that day.

Some investments made in smaller markets may be less liquid and the limited liquidity of these markets may therefore affect the respective underlying fund's ability to acquire or dispose of securities at the price and time it desires.

Market Risk

The value of the ILP Sub-Fund and the Underlying Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Furthermore, it should be noted that the legal infrastructure and accounting, auditing and reporting standards in certain countries in which investments may be made do not provide the same degree of investor protection or information to you as would generally apply in major securities markets. As the ILP Sub-Fund and Underlying Fund invest in securities in various markets, e.g. global, Asia ex-Japan, etc, the Net Asset Value of the ILP Sub-Fund and Underlying Fund will be influenced by the prices of these investments. This will in turn have an impact on the value of Units of the ILP Sub-Fund.

Political Risk

Investments in countries with less stable political and economic environments may be more volatile than those in the developed countries. The prices of investments in these markets may be influenced by economic and political conditions and interest rates.

Regulatory Risk

You should be aware that some of the industries which the ILP Sub-Fund and the Underlying Fund invest in may be subject to greater government regulations than many other industries in certain countries. Changes in government policies and the need for regulatory approval may have a material adverse effect on these industries. The companies which the ILP Sub-Fund invests in directly or through Underlying Fund may also be subject to risks of developing technology and communications, competitive pressures and other factors and are dependent upon consumer and business acceptance as new technologies evolve. Trading in such securities may be subject to more abrupt price movements.

Specialized Investment Risk

You should be aware while specialized investments, i.e investments in a single country, specific industries, sectoral or regional Fund may present greater opportunities and potential for capital appreciation, they may also be subjected to higher risks as they may be less diversified than a

global portfolio. The legal infrastructure and accounting, auditing and reporting standards in certain countries in which investments may be made do not provide the same degree of investor protection or information to you as would generally apply in major securities markets.

Taxation

You should note that the proceeds from the sale of securities in some markets or the receipt of any dividends or some other income may be or may become subject to tax, levies, duties or other fees or changes imposed by the authorities in that market, including taxation levied by withholding at source.

EXPENSE RATIO

The expense ratio for the period 1 January 2024 to 31 December 2024 is 1.73%.

The expense ratio is calculated in accordance with the Investment Management Association of Singapore's guidelines on the disclosure of expense ratios and based on the figures in the ILP Sub-Fund's latest audited account.

The following expenses are excluded from the calculation of the expense ratio:

- (a) charges for insurance coverage;
- (b) brokerage and other transaction costs;
- (c) performance fees;
- (d) foreign exchange gains and losses;
- (e) front or back-end loads arising from the purchase or sale of other funds; and
- (f) tax deducted at source or arising from income received.

TURNOVER RATIO

The turnover ratio of the ILP Sub-Fund follows that of the Underlying Fund as the ILP Sub-Fund invests all or substantially all of its assets into its Underlying Fund.

The unaudited turnover ratio of the Underlying Fund for the one-year period ending 31 December 2024 is 34.12%.

SOFT DOLLAR ARRANGEMENT

None of the Manager or the Investment Manager may retain cash or other rebates from a broker or dealer in consideration of directing transactions in a Fund's assets to such broker or dealer. Without prejudice to the foregoing, none of the Management Company nor the Investment Advisers currently retain soft dollars in respect of the Funds.

Risk Disclosure Statement for Funds

US Tax Withholding and Reporting under the Foreign Account Tax Compliance Act ("FATCA")

Under the FATCA provisions of the U.S. Hiring Incentives to Restore Employment ("HIRE") Act, where a Fund invests directly or indirectly in U.S. assets, payments to the Fund of U.S.-sourced income after 30 June 2014, gross proceeds of sales of US property by the Fund after 31 December 2016 and certain other payments received by the Fund after 31 December 2016 will be subject to 30% U.S. withholding tax unless the Fund complies with FATCA.

FATCA compliance can be achieved by entering into an agreement with the U.S. Secretary of the Treasury under which the Fund agrees to certain U.S. tax reporting and withholding requirements as regards holdings of and payments to certain investors in the Fund. Certain governments may enter into agreements directly with the U.S. government concerning U.S.-sourced income and the regulations and rules which are issued following these agreements will determine how the Fund can achieve FATCA compliance.

If the Fund is unable to satisfy the obligations imposed to avoid the imposition of the withholding tax, certain U.S.-sourced payments to the Fund may be subject to 30% withholding tax, which could reduce the cash available for investors. Any amounts of U.S. tax withheld may not be refundable by the Inland Revenue Service.

You are advised to consult your professional advisors on the impact of FATCA on any Fund that you have selected for allocation of any part of your Policy premium(s) and AIA Singapore makes no representation or warranty that a Fund is FATCA-compliant.

In the context of the above, a "Fund" means a collective investment scheme within the meaning of the Securities and Futures Act 2001, Singapore and the Notice No. MAS 307 applicable to Investment-Linked Policies issued by the Monetary Authority of Singapore.

The AIA European Equity Fund is an investment-linked policy (ILP) fund offered by AIA Singapore Private Limited ("AIA Singapore") and is only available under AIA Investment-Linked Policies. AIA Singapore is the product provider. This fund summary (IFPS) is prepared by AIA Singapore and the information presented is for informational use only. Investments are subject to investment risks including the possible loss of the principal amount invested. Past performance, as well as the prediction, projection or forecast on the economy, securities markets or the economic trends of the markets are not necessarily indicative of the future or likely performance of the ILP fund. The performance of the ILP fund is not guaranteed and the value of the units in the ILP fund and the income accruing to the units, if any, may fall or rise. A product summary and product highlights sheet relating to the ILP fund are available and may be obtained from your AIA Financial Services Consultant. A potential investor should read the product summary and product highlights sheet before deciding whether to subscribe for units in the ILP fund. AIA Singapore does not warrant or make any representations regarding the use or the results of the use of the figures generated in terms of their correctness, accuracy, reliability, or otherwise.
