KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the Sub-Fund and its distribution (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Please refer to the AIA Investment Fund Product Summary for further information on risks of the Sub-Fund.

Market and Credit Risks

- **You are exposed to market risks.**
 - As the Sub-Fund invests in securities of issuers globally, the Net Asset Value of the Sub-Fund will be influenced by the prices of these investments. The investments in these markets may be affected by changes in political conditions, regulatory, economic and interest rates environment.
- **You are exposed to credit risks.**
 - Bonds and other fixed income securities in which the Sub-Fund may invest in are subject to credit risks, such as risk of default by issuers.
- **You are exposed to risks in investing in specific markets.**
 - While investments in a single country, specific industries, sectoral or regional funds may present greater opportunities and potential for capital appreciation, they may be subjected to higher risks as they may be less diversified than a global portfolio.
 - The regulatory, disclosure and financial reporting standards may differ significantly from, and offer less investor protection compared to, internationally recognised standards.
- **You are exposed to currency risk.**
 - The investments of the underlying fund may each be denominated in a number of different currencies and hence be subjected to fluctuations in currency exchange rates and in certain cases, exchange control regulations.

Liquidity Risks

- **The Sub-Fund is not listed and you can only redeem on Valuation Days⁴.**
 - There is no secondary market for the Sub-Fund. All redemption requests should be made to the AIA Customer Service Centre or through your AIA Financial Services Consultant or Insurance Representative.

Product-Specific Risks

- **You are exposed to risks of investing in equities.**
 - The value of the securities in which the Sub-Fund will invest will fluctuate depending upon the general trends of stock markets and prevailing interest rates.
 - The economic environment of the countries in which the Sub-Fund invests will have an impact on the value of the securities acquired. The value of the Sub-Fund is affected by such changes in the market conditions and interest rates.
- **You are exposed to risks of investing in fixed income securities.**
 - An increase in interest rates and/or credit risk premiums will generally reduce the value of the fixed income securities.
 - High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk
- **You are exposed to risks of using derivative instruments.**
 - The ILP sub-fund and the underlying fund are authorised to use derivative instruments from time to time. Derivative instruments are financial contracts whose values are “derived” from the value of the underlying assets.
 - While the professional use of derivatives may be beneficial to the overall investment portfolio, derivatives in themselves involve different risks which may be greater than those of more traditional investments.
- **You are exposed to risks associated with dividend distribution.**
 - Dividends from the underlying fund(s) may be adversely affected by (amongst others) investee entities suffering unexpected losses and/or paying lower than expected dividends.
 - The dividend distribution rates and frequency of the distribution are not guaranteed.
 - AIA Singapore intends to distribute dividends from the income and/or net realised gains of the ILP Sub-Fund, and AIA Singapore maintains the discretion to distribute dividends out of capital. Where dividend distributions are made out of the capital, it may lead to a reduction in investor’s original investment and may also result in reduced future returns to the investor.
