- **You are exposed to risks associated with Stock Connect**
 - The Sub-Fund may invest in certain China A shares through Stock Connect. The ability to trade through Stock Connect in a timely manner may be affected by quota limitations and PRC regulatory restrictions. A suspension in trading through Stock Connect will adversely affect the ability to access the PRC market. Differences in trading days in the PRC and Hong Kong markets also leads to the risks of price fluctuations in the shares when Stock Connect is not trading.
 - Trading through Stock Connect is subject to other risks, including clearing and settlement risks (e.g. if the PRC clearing house defaults on its obligation, the Sub-Fund may suffer delays and/or inability to recover losses), restrictions on selling imposed by front-end monitoring, nominee arrangements in holding China A shares and regulatory risk.
- **You are exposed to sustainable investing risk**
 - The identification of Sustainability Risks and their likely impact is performed on the holdings of a given portfolio. For investments relating to individual companies (e.g. bonds, equities), this assessment is made on the basis of the company’s sector categorisation and their business model (e.g. carbon emissions for construction companies; ethics and culture for finance companies) in combination with regular dialogue between analysts, portfolio managers and the ESG team.
