## Product-Specific Risks

- **You are exposed to risks of investing in equities.**
  - The value of the securities in which the Sub-Fund invests will fluctuate depending upon the general trends of stock markets and prevailing interest rates.
  - The economic environment of the countries in which the Sub-Fund invests will have an impact on the value of the securities acquired. The value of the Sub-Fund is affected by such changes in the market conditions and interest rates.
- **You are exposed to risks of investing in fixed income securities.**
  - An increase in interest rates and/or credit risk premiums will generally reduce the value of the fixed income securities.
- **You are exposed to risks of using derivative instruments.**
  - The Sub-Fund is authorised to use derivative instruments from time to time. As the volatility of prices of derivative instruments may be higher than that of their underlying stocks, commodities or other benchmarks, these derivative instruments are riskier.
- **You are exposed to QFII Risks**
  - The Sub-Fund may invest in China A shares and may incur losses due to limited investment opportunities, or may not be able to fully implement or pursue its investment objectives or strategy, due to QFII investment restrictions, illiquidity of the China A shares market, and/or delay or disruption in execution of trades or in settlement of trades.
- **You are exposed to risks associated with Stock Connect**
  - The Sub-Fund may invest in certain China A shares through Stock Connect. The ability to trade through Stock Connect in a timely manner may be affected by quota limitations and PRC regulatory restrictions. A suspension in trading through Stock Connect will adversely affect the ability to access the PRC market. Differences in trading days in the PRC and Hong Kong markets also leads to the risks of price fluctuations in the shares when Stock Connect is not trading.
  - Trading through Stock Connect is subject to other risks, including clearing and settlement risks (e.g. if the PRC clearing house defaults on its obligation, the Sub-Fund may suffer delays and/or inability to recover losses), restrictions on selling imposed by front-end monitoring, nominee arrangements in holding China A shares and regulatory risk.
